Daniel Mihaila

Developer / Information Technology student

daniel2005u@gmail.com GitHub: TheFirstCookie LinkedIn: Daniel Mihaila

I'm an Information Technology student at the Technical University of Moldova who learns by turning ideas into working projects. My work includes a vehicle inspection website and a fitness equipment storefront, with a focus on responsive layouts, clear navigation, and useful interactive features. I enjoy breaking complex tasks into manageable steps, researching solutions, and refining the details that make a website easier to use. I bring curiosity, a structured approach to problem-solving, and a willingness to learn from feedback. I'm looking for an opportunity to contribute to meaningful projects, develop alongside experienced colleagues, and take on increasing responsibility. I prefer remote work.

SELECTED PROJECTS

Avangard Autocheck

A website for independent vehicle inspections, with service packages, an interactive inspection overview, and an appointment enquiry flow.

avangard-codex-test.vercel.app · Source code

ForgeFit Supply

A gym equipment storefront with product search, category and brand filters, a shopping cart, and customer accounts.

gymshop-three.vercel.app · Source code
